- Multi-employer jobsite safety
- Construction risk management
- Safety and human resources
- Regulatory procedures, record keeping and documents

The Associated General Contractors of America's STP is a construction-specific training curriculum developed, updated and field-tested by and for contractors. **Supervisory skill – or the lack of it – directly affects every company's bottom line.** You make your money in the field, and STP can help you **(general and specialty contractors)** improve your construction firm's bottom line.

*The STP curriculum focuses on knowledge and skills every general and specialty contractor supervisor must have to be an effective manager of people, time, equipment and materials. STP curriculum is broken into six areas of focus. You are welcome to attend only the topics of interest to you or attend all sessions in any order you choose.*

Registrants are **REQUIRED** to purchase course materials from Amazon.com prior to the course.

- 1) If you don't have an Amazon.com account, create one
