

BIM Unit 3

BIM Project Execution Planning

Thursday, November 8, 2018

8:00 am – 5:00 pm

Offices of Ace Electric, 4387 Inner Perimeter Rd., Valdosta

Building Information Modeling (BIM) is changing the way projects are constructed. Whether you are a prime contractor using BIM across an entire project or a subcontractor impacted by a specific BIM implementation, this practice requires specific mindsets and technological know-how in order to achieve significant improvements in efficiency and cost control.

In concert with AGC of America, AGC Georgia is pleased to offer the nationally-recognized *BIM Education Program* curriculum to our members. The upcoming BIM 3 course is the third of four-courses offered over the next several months and is

designed as a mix of lecture, facilitated discussion and activities. Use cases provide examples to help you understand session concepts.

After completion of all BIM courses (shown to the right), and achieving a passing score on the credentialing exam, a candidate earns their CM-BIM credentials.

Following this course, participants will be able to:

- Identify the key attributes of a successful team.
- Explain contract liability and model usage.
- Identify BIM delivery methods.
- Understand the meaning and usage of Level of Development (LOD).
- Explain the key components of a BIM Project Execution Plan.
- Understand and explain the benefits of a synchronized project workflow.

Mark your calendar for the remaining BIM Course to be offered in this series. The course will be held in the Valdosta area. The exam will be hosted by AGC Georgia and held in the Chapter's Training Center in Atlanta.

Unit 4: BIM Adoption Implementation and ROI

December 3, 2018 and January 21, 2019
CM-BIM Credentialing Exam

The Certification of Management–Building Information Modeling (CM-BIM) program is the construction industry's first and only certificate program teaching the practical application of the BIM process for commercial construction firms.

The Associated General Contractors of America (AGC) is a Registered Provider with The American Institute of Architects Continuing Education Systems. Credit earned on completion of this program will be reported to CES Records for AIA members. Certificates of completion for non-AIA members are available on request.

The U.S. Green Building Council (USGBC) developed Leadership in Energy and Environmental Design (LEED®) Green Building Rating Systems for different applications, such as New Construction and Major Renovations, Commercial Interiors, Core and Shell, and Homes. The USGBC Education Provider Program has approved the technical and instructional quality of this course.
