Building Information Modeling (BIM) is changing the way projects are constructed. Whether you are a prime contractor using BIM across an entire project or a subcontractor impacted by a specific BIM implementation, this practice requires specific mindsets and technological know-how in order to achieve significant improvements in efficiency and cost control.

BIM
EDUCATION
PROGRAM

In concert with AGC of America, AGC Georgia is pleased to offer the nationally-recognized *BIM Education Program* curriculum to our members. The upcoming BIM 2 course is the second in a four-part series offered over the next several

months, and is designed specifically for construction professionals to establish a solid process for selecting BIM tools. Participants will investigate the significant impact models have for improving estimating, scheduling and coordinating.

After completion of all BIM courses (shown to the right), and achieving a passing score on the credentialing exam, a candidate earns their CM-BIM credentials.

BIM Unit 2 Course Topics

- BIM Technology, Capabilities, Processes, and Tools
- Estimating/Quantity Takeoff, Scheduling and Coordination

Following completion of BIM Unit 2, participants can:

- Explain what is meant by parametric modeling
- Match specific tools with their functions
- Explain a generic four-step process for creating and using a shop drawing and fabrication model
- Outline a process for estimating and scheduling
- Explain a 4-step process for selecting BIM software
- Explain how to identify what project components should be modeled and determine what level of detail is required
- Explain how 4D models are created

Mark your calendar for the remaining two BIM Courses to be offered in this series. All courses and the exam will be hosted by AGC Georgia and held in the Chapter's Training Center.

Unit 4: BIM Process, Adoption, and Integration

December 20, 2019

CM-BIM Credentialing Exam

The Certification of Management–Building Information Modeling (CM-BIM) program is the construction industry's first and only certificate program teaching the practical application of the BIM process for commercial construction firms.

The Associated General Contractors of America (AGC) is a Registered Provider with The American Institute of Architects Continuing Education Systems. Credit earned on completion of this program will be reported to CES Records for AIA members. Certificates of completion for non-AIA members are available on request.

The U.S. Green Building Council (USGBC) developed Leadership in Energy and Environmental Design (LEED®) Green Building Rating Systems for different applications, such as New Construction and Major Renovations, Commercial Interiors, Core and Shell, and Homes. The USGBC Education Provider Program has approved the technical and instructional quality of this course.
