

Leading Edge Training

Understanding the hazards and knowing the standards

Complimentary Lunch and Learn

Sponsored by 3M

Solving safety challenges requires a real world understanding of what those challenges are. Exposure to a leading edge is often a real-world challenge presented when using fall protection equipment. The subject of leading edge can be difficult to comprehend. This training provides a better understanding of the risks and the solutions available to cover your leading-edge needs.

Discussion will include:

- ANSI 359.14 - Understanding the leading-edge standard
- What constitutes a leading edge or a sharp edge?
- How much fall clearance do I need?
- The proper hook for the job?
- Proper tie-off below D-ring height (including foot-level tie-off)
- How does swing fall affect leading edge tie off?
- How do I tell if a product is leading edge compatible?
- Can I just use an additional shock pack?
- Where can I connect on a leading edge?
- Horizontal Lifelines and leading edge?

A 3M™ DBI-SALA® Smart Lock Leading Edge Self-Retracting Lifeline will be given away during the session so don't forget your business card! Must be present to win.

Who

Targeted audience includes:
Site superintendents and safety managers

When

Friday, January 18, 2019
11:30 am – 1:00 pm, *includes lunch*
