

UNIT 1 – Variation in Production Systems

All classes will be held from 8:00 am – 12:00 pm on the following dates:

◆ Wednesday, August 19, 2020

Everyone related to the construction process has incentive to get the project done faster and at a lower cost – from the project owners who want to see tangible results for their investment to the contractors and designers who want to do their job well and move on to the next project. Lean Construction is based on the holistic pursuit of continuous improvements aimed at minimizing costs and maximizing value on a construction project: planning, design, construction, activation, operations, maintenance, salvaging and recycling.

To develop the tools needed to build lean, the Associated General Contractors of America (AGC of America) has developed the Lean Construction Education Program. All construction team members can learn the building blocks to transform projects and companies into a lean operating system.

Becoming a Lean Construction Champion

How lean is implemented within a construction firm can vary based on many factors, however, lean transformation is most effectively driven and planned by individuals within a firm. This series of courses below are intended for an organization's lean champions who will design and implement a company's lean transformation strategy at the corporate and project levels. The courses in this program will cover:

- Unit 1: Variation in Production Systems
- Unit 2: Pull in Production
- Unit 3: Lean Workstructuring
- Unit 4: The Last Planner System
- Unit 5: Lean Supply Chain and Assembly
- Unit 6: Lean Design and Preconstruction
- Unit 7: Problem-Solving Principles and Tools

Earn Your Lean Construction Credential

Following completion of all seven units of the Lean Construction program, participants will be qualified to sit for an exam to earn AGC of America's Certificate of Management–Lean Construction (CM-Lean).

Build a Foundation with Lean Construction 101

Login at www.agc.org with your AGC of America username and password and participate in the Lean Construction 101 online course. This **one-hour session is complimentary** for representatives of AGC members, and is a great primer for those interested in building their awareness of Lean Construction. From www.agc.org, choose Training & Education, then Lean Construction.

Ed Beck will be teaching the AGC Georgia Lean Construction program. He has over 40 years of construction experience, serving in a variety of roles including field superintendent, project manager, client executive, vice president, and company partner. During his career, he's been a team member of projects totaling more than \$1 billion. He is now owner of the construction management consulting practice, Ed Beck CM, LLC, where he serves owners, contractors, architects and non-profit organizations. He enjoys sharing his 20+ year passion for implementing lean construction practices.

The Associated General Contractors of America (AGC) is a Registered Provider with The American Institute of Architects Continuing Education Systems. Credit earned on completion of this program will be reported to CES Records for AIA members. Certificates of completion for non-AIA members are available on request.

UNIT 1 Variation in Production Systems

Lean Construction challenges all project stakeholders to develop and apply better ways to manage the overall construction process. This course introduces “variation,” a foundational Lean Construction concept. In the construction process, the work we do is all connected and variation in even one of those processes affects us all. This course provides tools to help participants recognize sources of variation on their own projects, examine variation’s effect on operations, and mitigate the effects of variation in their every-day work. Following completion of this course, participants will have the ability to:

- Define the different types of variation
- Explain the concept of throughput and distinguish it from productivity
- Discuss the role of variation in production operations
- List sources of variation in construction settings
- Explain and contrast variation mitigation techniques

Pricing Options

	Class Fees
Representative of AGC Georgia Member	\$145
AGC Georgia Young Leadership Program Member	\$125
Representative of Non-AGC Georgia Member	\$245

Registration fees do not include required book.

AGC GA Members Save \$20 by registering at www.agcga.org / All increase \$20 if registration is received within two weeks of class start date.

Please note: Registrants are required to purchase Variation in Production Systems in e-book form from Amazon.com or hard copy from AGC Georgia.

I elect to purchase a HARD COPY of Unit 1: Variation in Production Systems for \$90 from AGC Georgia.

Follow below steps to purchase \$50 e-book OR see above to purchase hard copy

1. Login or create Amazon account
2. Search for AGC Variation in Production Systems
3. Add e-book to cart and pay \$50
4. Download Kindle App to mobile device and bring device to class.

Attendee Information

Company Name: _____

Name: _____ Email: _____

Check payable to **AGC Georgia**. Mail completed form w/check to Wells Fargo/AGC Georgia; POB 934023; Atl., 31193-4023

AmEx MC Visa Discover

Cardholder’s Name: _____ Card #: _____ Exp: _____

TOTAL DUE \$ _____

Regardless of payment method, please use one of the methods below to return this form:

- **Electronically:** On many systems, pressing “Click to Submit” after filling out form will attach file to automated email. Please verify inside your system the email was sent to AGC Georgia.
- **Fax:** 678-298-4101
- **Email:** (after manually filling out form): registration@agcga.org

For more information, please contact Cindy Parham at 678.298-4112 or parham@agcga.org. **Cancellation Policy:** Registration fee is refundable up to one week prior to the course. If you do not cancel before one week OR do not attend seminar, the registration fee will not be refunded. Substitutions are encouraged; arrange by calling 678.298.4112. Email confirmation of your registration will be sent one week before course.
