The Associated General Contractors of America's Supervisory Training Program (STP) is a construction-specific training curriculum developed, updated and field-tested by and for contractors. Supervisory skill – or the lack of it – directly affects every company's bottom line. You make your money in the field, and STP can help you improve your organization's bottom line.

STP focuses on the knowledge and skills every supervisor must have to be an effective manager of people, time, equipment and materials.

The **Planning and Scheduling session** will help construction supervisors understand ways in which planning and scheduling saves time and money, while increasing quality in the construction process. Topics include:

- Preparing the project plan
- Communicating the plan
- The critical path
- Computer use in scheduling
- Using the schedule on the jobsite
- Updating the construction schedule
- The schedule as documentation
- Using planning and scheduling

**Who should attend?** Field superintendents, foremen, assistant project managers, and project managers

**About the Instructor** – Dr. Holtzower has taught at the University level for 9 years and is heavily involved in student competitions, industry events with AGC Georgia, and student success. He has 9 years of professional construction experience including commercial construction management, electrical contracting, and management experience with a fire protection contractor.
