The Associated General Contractors of America's Supervisory Training Program (STP) is a construction-specific training curriculum developed, updated and field-tested by and for contractors. Supervisory skill – or the lack of it – directly affects every company's bottom line. You make your money in the field, and STP can help you improve your organization's bottom line.

STP focuses on the knowledge and skills every supervisor must have to be an effective manager of people, time, equipment and materials.

The **Leadership and Motivation session** explains the tangible and intangible benefits of effective supervision and motivation of others on the team. Participants will engage in open conversations on the following:

- The dollars and sense of people in construction
- The role of the construction supervisor
- Helping people perform better
- Motivating and leading others
- Positive feedback
- Training and orienting crew members
- Teams and team building
- Leadership skills in action

Who should attend? Field superintendents, foremen, assistant project managers, and project managers

About the instructor – Daphene has over 15 years of construction industry experience on commercial and industrial projects. Her roles have included project manager, safety manager, construction services leader and pipefitters help.
